OVERVIEW:

For pulp capping only Ready to use Water based paste Highly alkaline

DESCRIPTION:

D-Techs CAL- PLUS is a premixed water based Calcium Hydroxide Paste with high Radiopacity. This self setting material is useful in pulp capping and as a protective base/ liner under dental filling material. Cal - Plus protects the pulp in case of acid containing fillings and linings. It dries quickly by air and can also be used for temporary filling of root canals. Applied in several layers Cal-Plus provides a degree of thermal insulation for the pulp.
